

Content Repurposing

One useful idea turned into a connected content series

SOURCE CONTENT

"5 Things to Check Before Buying a Home"

Original format: 6-slide educational carousel

1. CAROUSEL

Use the original 6-slide carousel.

Purpose: Education and saves.

2. SHORT-FORM REEL

Turn the five points into a 20–30 second text-based Reel. Hook: "Buying a home? Check these 5 things first."

Purpose: Reach and discovery.

3. STORY SERIES

Turn each point into one Story frame, followed by a final CTA.

Purpose: Engagement and replies.

4. SINGLE-IMAGE POST

Create a simple checklist: "Before You Buy: 5 Things to Check"

Purpose: Quick-reference content.

5. CAPTION

Create a longer educational caption explaining why each point matters.

Purpose: Education and saves.

6. FOLLOW-UP FAQ

Create a second post from a common question, such as "What costs should buyers plan for beyond the purchase price?"

Purpose: Continue the conversation.

THE REPURPOSING SYSTEM

**1 original idea → 1 carousel → 1 Reel → 1 Story sequence → 1 single-image post → 1 caption
→ 1 follow-up FAQ**

DENTAL EXAMPLE

"5 Signs You Shouldn't Ignore a Toothache"

Repurpose into:
• Educational carousel
• Short-form Reel: "5 toothache warning signs"
• Story quiz
• Single-image checklist
• Educational caption
• Follow-up FAQ: "When should tooth pain be evaluated?"

What AI Content Lab provides

- Identify reusable ideas from existing content
• Adapt content to different formats
• Create new hooks and CTAs
• Turn long-form information into short-form content
• Create follow-up content from audience questions
• Build a connected content series from one original idea

The goal is not to copy the same post repeatedly. The goal is to extract useful ideas and adapt them into formats suited to each platform and audience.
