

MISSING A TOOTH?

Here are 5 things to know about
dental implants.

1. THEY REPLACE THE MISSING TOOTH ROOT

**A dental implant acts as an artificial
tooth root and supports a
replacement crown.**

2. THEY CAN HELP RESTORE CHEWING

Missing teeth can make eating uncomfortable. Implants can provide a stable replacement option when clinically suitable.

3. THEY DON'T REQUIRE REMOVING A DENTURE EVERY DAY

**Implants are designed as a fixed
replacement option rather than a
removable tooth.**

4. EVERY PATIENT NEEDS AN ASSESSMENT

**Bone health, gums, overall oral
health and your specific situation all
matter before treatment.**

THINKING ABOUT REPLACING A MISSING TOOTH?

**A dental consultation can help you
understand your options.**
